Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Rivetti et al. (US Pat. No. 5,686,644) teach a procedure for the production of alkyl carbonates by reacting an alcohol, oxygen and carbon monoxide in the presence of cuprous chloride as catalyst. The instant process differs from the prior art by a method for removing reaction byproduct alkyl chloroformate from reaction mixture by passing said mixture through a fluid passageway at a temperature of about 30° C to about 130°C and for a residence time of about 0.5 hour to about 10 hours. The prior art process neither teaches nor renders obvious the instant claimed invention and there is no suggestion or motivation to modify the process of other

prior arts to obtain the instant invention. Therefore the instant claims are allowable over the prior art of record.
